

## Requirements for completion of „**MEDICAL CHEMISTRY**“

1st GM, *academic year 2012/2013*

### **For successful completion credit of practical exercises is required:**

1. Participation in all (100 %) practical exercises, theoretical and methodological manage practical tasks.
2. Get at least 60 % of the total score for ongoing review of the theoretical training to practical exercises. Monitoring is done at every practice (except in the following paragraph), lecturing on topics from the previous week and substance-related exercise for the week writing (small test, oral examination). The evaluation is assessing the results of practical tasks.
3. In the case where a student does not write refresher test due date or without sufficient evaluation, the test may be repeated in the last week of the semester.
