## NURSING

## BIOCHEMISTRY

1<sup>nd</sup> year

0/2 CE

Winter term

Biochemistry belongs to the theoretical subjects in the study of nursing. In the subjects are included also chapters from Medical Chemistry. The student acquire fundamental knowledge on process dynamics in living organisms including humans. The knowledge will be used in the study of other pre-clinical and clinical subjects.

The teaching is performed in 2-hour seminars, in which first of them lectures gives topics and in second the students are involved by giving questions and seminars.
