

PREPARATION FOR THE ADMISSION TEST

CHEMISTRY

2 hours/2 weeks

sept. – may

A part of the admission to the Medical Faculty UPJŠ in Košice is an admission test from high school chemistry, biology and physics. The preparation course organized by the Foundation for support and development of medical education helps in preparation of the students for the admission test. The aim of the course is repetition of high school knowledge for successful completion of the test.

The preparation is conducted by the teachers of our institute who wrote also the Essentials from chemistry for admission test.
